

# Sansevieria triafsciata 'Variegata'

VARIEGATED SNAKE PLANT, MOTHER-IN-LAW'S TONGUE

Tall, vertical sword-like leaves with wavy, green & silver bands, with delightful golden margins distinguish these Snake Plants from many others. One of the most popular due to their coloration, these plants slowly multiply and offset to create narrow tidy clumps. They are heat tolerant but do not accept full sun easily. They are best used in part sun to be filtered light or as indoor plants in bright light. Provide loose, well-drained soils with periodic, but infrequent watering. They work well in containers, for patios, entryways, or courtyard plantings in frost-free locations.
