

Bignonia capreolata 'Tangerine Beauty'

'TANGERINE BEAUTY' CROSSVINE

Sturdy blooming vine for shade. Being native to the southeast, this vine ignores the heat as long as it has ample water to become established. While they are adaptable to a wide range of conditions, in our low desert this vine prefers morning sun with afternoon shade. Give it room to spread. With some support vines will grow sturdily to cover trellises, arbors, poles, or walls. Leaves are glossy green that cloak the woody stems well. Flowers are borne in clusters during spring into summer, with some even lingering into winter months. Easy-to-grow and manage.
