PLANT DETAILS

Eremophila glabra

SUNRISE TRAILING YELLOW EMU, YELLOW
TRAILING EMU

Wide, evergreen lush-looking groundcover. This Emu stays relatively low, but it can spread wide as it matures. We list this plant at a comfortable 5-6 ft. spread, but some older specimens in Phoenix and Palm Springs have been noted to have grown to 10 ft. wide or more. They are not considered aggressive growers though. Selective annual pruning right after flowering is all that is needed to control their size. Low to moderate water needs and well-draining soils are all they need to be healthy and happy. Bright green, lush foliage is covered by golden yellow blooms starting in winter with bloom peeking in early spring
