PLANT DETAILS

# Hibiscus rosa-sinensis 'Itsy Bitsy Red'

## 'ITSY BITSY RED' HIBISCUS

Dark green leaves with deep red tropical blooms. The name 'Itsy Bitsy' refers to the smaller leaves and flowers of this variety, not the size of the plant. They are vigorous, upright growing woody perennial shrubs. Typically used for hedge plants, solitary specimens or for large containers. They do appreciate afternoon shade in low desert landscapes and regular irrigation, especially through the summer, but they tolerate heat with no issues. Maintenance is periodic shearing or thinning to control size. Watch for common insects on Hibiscus and control soft-bodied pests like aphids, mites or whiteflies as needed with insecticidal soap. Although they can grow large, this is one of the most durable varieties for Phoenix.

### DESCRIPTION
