PLANT DETAILS

Leucophyllum candidum 'Silver Cloud'

'SILVER CLOUD' SAGE

Silver-white foliage with amethyst purple blooms. All *Leucophyllum* sp. are lumped together as Texas Sage, although each variety has different appearance and growth habits. 'Silver Cloud' is a selection with small round highly pubescent white to gray foliage and stems. Dark purple blooms form during late spring and summer. Little to no maintenance is needed if the proper sized cultivar is chosen for the allowable space. Heavily pubescent plants are an evolutionary clue to gardeners that those plants have a natural adaptation to heat and drought. They require well-drained soil, and resent over-watering, especially during cool weather months.

DESCRIPTION

 UP TO 4 FT. x 3-4 FT.

 FULL SUN

 USDA ZONE 8-11

 TEXAS AND MEXICO

 DARK PURPLE
