PLANT DETAILS

Leucophyllum frutescens 'Heavenly Cloud'

HEAVENLY CLOUD TEXAS SAGE

Small, wavy green leaves with big purple blooms. This selection of Texas Sage is unique for its smaller darker green wavy leaves. When conditions are optimal, masses of big, bright purple colored flowers appear during summer monsoon season. These are large, fast growing upright shrubs. While this selection accepts shearing, doing so can limit its blooming potential. Their size and dense growth do lend them to be utilized as a low water, evergreen screen, or privacy hedge. They are most commonly used as foundational shrubs in residential and commercial landscapes.
