PLANT DETAILS

Leucophyllum langmaniae 'Lynn's Legacy'

LYNN'S EVERBLOOMING OR LOWERY'S
LEGACY TX SAGE

Olive green leaves with masses of big lavender blooms! These are green, not gray, shrubs that grow moderately fast and sturdily to a manageable size of 4 to 5 ft. They are adaptable, tolerant of low desert heat and high humidity. With regular supplemental summer irrigation, these shrubs will be healthy and long-lived. Their real show starts during summer when rising relative humidity forces copious amounts of big, bright lavender blooms that completely cover the stems turning the entire plant into a purple mass. Avoid shearing these plants. Give them room and time to grow to full maturity.

DESCRIPTION
