PLANT DETAILS

Myrtus communis 'Compacta'

DWARF MYRTLE, COMPACT MYRTLE

Small tough shrubs with fragrant leaves and flowers. This is a dwarf selection of evergreen hardy myrtle. They do grow in a compact form, with small dark green, aromatic leaves. Cream to white flowers with long stamens appear in spring, followed by small dark berries. These plants take well to shearing or pruning but do so after flowering has finished. Ideal for low formal evergreen borders or short hedges, they also do well in containers and are considered clean enough for pool plantings. They have a lush, Mediterranean look.
