PLANT DETAILS

Nerium oleander 'Petite Pink'

'PETITE PINK' OLEANDER

Widely used floriferous, evergreen shrub. The most popular dwarf oleander selection, if not the most popular evergreen flowering shrub, period! Petite pink oleander grows at a moderate to fast rate. Its height typically matches its width unless manipulated by pruning. The heaviest flower displays are in spring, but they can produce flowers almost anytime during the growing season. Like others, pods can be removed, as needed, after flowering for a tidier appearance. They will appreciate extra or regular watering during flowering, but they are extremely drought tolerant plants. Resist shearing whenever possible for lovelier plants.

DESCRIPTION

 3-6 FT. x 4-5 FT.

 FULL SUN

 USDA ZONE 9-11

 MEDITERRANEAN

 LIGHT PINK

 LOW TO MODERATE

 TO 25°F
