

Nerium oleander - Tree 'White'

WHITE OLEANDER TREE

Classic evergreen, flowering small trees. We have started the training for you with these versatile, multi-function ornamental accent trees. Standard or full sized oleander trees, are evergreen vigorous and long-blooming. They work equally well for residential landscapes or commercial projects. Plant them wherever a small umbrella shaped flowering tree will fit. They can grow about 20 ft. tall, with an equal spread. Flowers of standard oleanders are large and bright, blooming from spring to summer. Flowers are followed by clustered seed pods that look like skinny, dark brown cigars. Pods can be pruned off in late summer to keep trees tidy. Extremely heat and drought tolerant plants, although supplemental water from late spring to summer while they are flowering is beneficial.

DESCRIPTION	
	UP TO 20 FT. X 20 FT.
	FULL SUN
	USDA ZONE 9-11
	MEDITERRANEAN
	WHITE
	MODERATE TO LOW
	TO 25°F
