

Rhaphiolepis indica 'Pink Lady'

'PINK LADY' INDIA HAWTHORN

Well-behaved, compact flowering shrubs. Medium sized with a moderate growth rate these evergreen Asian shrubs are perennial flowering favorites for foundation plantings, low hedges, or as single specimens. They prefer filtered sun or morning sun with afternoon shade but can tolerate western sun if provided with ample water during the summer. The dark green leaves are round to oval, slightly wavy with an attractive sheen and have a strong leathery texture. They flower in spring with clusters of deep pink buds that open to light pink star shaped blooms. New stems can have a fuzzy, caramel colored pubescence that is also attractive contrast to the foliage color. Durable and easy to cultivate with few pests or disease problems.

DESCRIPTION	
	UP TO 4-5 FT. x 4-5 FT.
	PART TO FULL SUN
	USDA ZONE 7-10
	CHINA
	LIGHT PINK
